

THE BKX TRAY FROM BEEKENKAMP PLANTS

Sustainability

Sustainability is a top priority at Beekenkamp Plants. We raise our young plants in a hard plastic tray: the BKX tray. These trays are returned, washed and reused, thereby reducing their environmental footprint.

Development

Beekenkamp Plants has developed a range of BKX trays in tandem with its sister company Beekenkamp Verpakkingen. Thanks to this close collaboration, the trays are perfectly optimised for cultivation and fit in seamlessly with our customers' requirements.

Reuse

When BKX trays are returned, they are thoroughly cleaned and sorted ready for reuse. Whereas the previous versions of BKX trays made of polystyrene were designed for an average usage of 1.5 times, BKX trays last for decades.

The future

BKX trays are ideal for automatic potting and enable perfect removal of the young plants. With an eye on the future, the trays are an excellent choice and absolutely indispensable with the rapid increase in automation.

DEPOSIT

BKX trays from Beekenkamp Plants are reused and are therefore a more environmentally friendly solution. A key part of this is customers returning the trays. A deposit system therefore applies to all outgoing BKX trays.

Every tray that leaves the production site is scanned and fitted with a unique RFID tag which logs exactly where the BKX trays are sent.

As a customer, you pay a deposit. The trays are scanned again upon receipt at your company. When you return the tray, you get your deposit back!

RETURN

1. Empty BKX trays are collected from you when you receive your next delivery.
2. Not receiving a new delivery? Then simply email trolley@beekenkamp.nl to arrange collection.

Important! Do not remove the sticker from the BKX tray. Place the barcode on the outside of the trolley.

BKX tray with sticker

BKX tray without sticker

BENEFITS

- Lower environmental impact
- Long tray life span
- Ideal for automatic potting
- All tray sizes can be stacked together
- No tray breakage during transport
- Easy young plant removal
