Gestion des produits et marketing

Notre équipe Gestion de Produits teste et évalue en permanence notre propre matériel génétique ainsi que celui de nos partenaires dans le secteur de l'hybridation, afin de développer nos connaissances et perspectives techniques.

Le recours aux techniques modernes d'hybridation est la clé du succès chez Beekenkamp Plants. Nos activités d'hybridation sont axées sur l'amélioration de la qualité des produits, depuis les boutures non racinées jusqu'aux plantes finies, ainsi que sur l'amélioration de la tolérance aux ravageurs et aux maladies.

Nous nous efforçons également de réduire les besoins en régulateurs de croissance, tout en allongeant la durée de conservation et la performance au jardin.

Les investissements sont basés sur une vision claire des besoins futurs à tous les niveaux de l'horticulture ornementale actuelle et de la chaîne logistique. Il est très important pour nous d'avoir des sites d'essai dans différentes parties du monde, car l'objectif de Beekenkamp est de fournir aux consommateurs les meilleurs produits disponibles dans leur zone climatique.

Tous ces essais nous permettent de contrôler le développement de nos matériels génétiques sous différents climats et dans diverses conditions de culture. La base de données complète de Beekenkamp comprend des informations détaillées provenant du monde entier, qui tiennent compte de chaque situation spécifique de culture. Ceci afin de vous fournir les données et les conseils de culture les plus récents.

Notre équipe Marketing s'inspire de l'ensemble de la chaîne logistique de l'horticulture ornementale, du producteur au distributeur et jusqu'au consommateur final. Notre longue expérience et l'étroite coopération avec nos partenaires garantit un succès mutuel. Il vous suffit de contacter notre équipe de ventes ou notre agence. Nous nous réjouissons de travailler avec vous sur les visuels et les projets.
