

Sunny[®]

Hello Sunshine!

Sunny®

Hello Sunshine!

**WE PROUDLY PRESENT:
OUR SPECIALLY SELECTED SUNNY® OSTEOSPERMUM COLLECTION!**

As soon as the sun rises, Sunny opens her petals. Let yourself be swept away to the Mediterranean. Our specially selected Sunny® Osteospermum selection is a delightful addition to any garden with its array of appealing features. You can't miss the Sun(ny) this summer!

Firstly, Sunny® Osteospermum early flowering nature sets it apart, starting to bloom just 75 days after potting during spring and 147 days after potting during winter. This means you can enjoy its beautiful flowers earlier than many other varieties.

Furthermore, its easy branching ability ensures a lush, full plant body. Sunny® Osteospermum readily forms side branches, giving it a lovely, well-rounded appearance. The flowers of Sunny® Osteospermum are notably large, adding a striking presence to the garden or store presentations. Their size ensures they won't go unnoticed.

Another advantage of this remarkable plant is its harvest window, which spans a maximum of 10 days. During spring, you can expect to harvest the earliest variety to the latest variety in about 8 days. In winter, this timeframe extends slightly to around 10 days.

Lastly, Sunny® Osteospermum boasts eye-catching colors that are sure to draw attention. Feel the vibrant tones of spring and summer vibes! Sunny® Osteospermum selection never fails to fascinate with its dazzling display.
