PLANTS

Campanula Campala is not just any plant. It's the result of years of breeding expertise and passion at Beekenkamp Plants. With its trendy look, sea of flowers, and perfect uniformity, Campala is the campanula that conquers the gift market. This plant is made to stand out – a true eye-catcher on the shelf.

But there's more! Campala blooms up to 3 weeks earlier than comparable varieties and branches exceptionally well. This gives growers a powerful advantage: earlier sales opportunities, faster turnover, and a plant that arrives on the shelves already full of promise.

Campala also offers impressive durability, with at least two blooming cycles. The reblooming properties offer strong promotional potential, allowing retailers to promote Campala as a "reliable rebloomer" that offers long-lasting value.

Our assortment? White varieties for elegance and blue tones for a trendy, fresh look. These can be sold individually or as a white-purple duo set, giving retailers a colour combination that maximizes visual impact.

- In a set, the plants have the same:
- growth habit
 - time to market readiness

WHAT MAKES CAMPALA UNIQUE?

- Blooms up to **3 weeks earlier**
- Produced on BKX-tray and trimmed for a **fuller plant** with a **strong root** system
